

App Feature List - FamilyFind / NoxFind

Core Features:

- Device tracking
- Remote command execution
- High-priority notification system
- Background heartbeat monitoring

Reliability Features:

- Protection status (Active/Inactive)
- Battery optimization status
- Push token sync tracking
- Command delivery states (Sent / Received / Executed)

Advanced System:

- Foreground service (when needed)
- FCM-based command trigger
- Notification fallback actions (Run Now / Stop Ring)
- Admin panel with device monitoring

Architecture Highlights:

- KeepAliveService for heartbeat
- MessagingService for command receive
- CommandExecutor for execution
- Repositories for sync & tracking

Use Case:

A reliable device tracking + control system working within Android limitations using best-effort background architecture.
